it has been said that every generation of historians seeks to rewrite what a previous generation had established as the standard interpretations of the motives and circumstances shaping the fabric of historical events it is not that the facts of history have changed no one will dispute that the battle of waterloo occurred on june 11 1815 or that the allied invasion of europe began on june 6 1944 what each new age of historians are attempting to do is to reinterpret the motives of men and the force of circumstance impacting the direction of past events based on the factual social intellectual and cultural milieu of their own generation by examining the facts of history from a new perspective today s historians hope to reveal some new truth that will not only illuminate the course of history but also validate contemporary values and societal ideals although it is true that tackling the task of developing a new text on logistics and distribution channel management focuses

less on schools of philosophical and social analysis and more on the calculus of managing sales campaigns inventory replenishment and income statements the goal of the management scientist like the historian is to merge the facts and figures of the discipline with today's organizational cultural and economic realities hopefully the result will be a new synthesis where a whole new perspective will break forth exposing new directions and opportunities

new updated and expanded topics in the fourth edition include ebcdic grey code practical applications of flip flops linear and shaft encoders memory elements and fpgas the section on fault finding has been expanded a new chapter is dedicated to the interface between digital components and analog voltages a highly accessible comprehensive and fully up to date digital systems text a well known and respected text now revamped for current courses part of the newnes suite of texts for hnd 1st year modules

this textbook provides an introduction to financial mathematics and financial engineering for undergraduate students who have completed a three or four semester sequence of calculus courses it introduces the theory of interest discrete and continuous random variables and probability stochastic processes linear programming the fundamental theorem of finance option pricing hedging and portfolio optimization the reader progresses from a solid grounding in multi variable calculus through a derivation of the black scholes equation its solution properties and applications

fox mcdonald's introduction to fluid mechanics 9th edition has been one of the most widely adopted textbooks in the field this highly regarded text continues to provide readers with a balanced and comprehensive approach to mastering critical concepts incorporating a proven problem solving methodology that helps readers develop an orderly plan to finding the right solution and relating results to expected physical behavior the ninth edition features a wealth of example problems integrated throughout the text as well as a variety of new end of chapter problems
